

# 2023 Star Program

The Star program is an opportunity for students who score "Proficient" or "Highly Proficient" on the spring state tests to have a positive impact on the current course that correspond to the individual tests.

## WHO:

This is available to students taking the AzSci, ACT, PreACT-Secure, and ACT Aspire

**Classes:** Science, Math and English

## How it works:

- If a student earns a "Proficient" Score, the student will get 4% points added to either the 1st or 2nd semester grade for the corresponding course which ever helps them the most.
- If a student earns a "Highly Proficient" Score, the student will get 6% points added to either the 1st or 2nd semester.

### Example:

A student earns a score in the "proficient" range on the Math Test Section of the ACT Aspire. The student earned an 83% 1st semester in their Algebra class and a 78% 2nd semester. The 4% point boost would be added to 2nd semester bring the student's final grade to a 82%.  
(Current year classes only.)
